

ASP.NET Application Developer

Vocantas is looking to add to its dynamic Development team. If you are looking for a new challenge and like a high-energy environment working with innovative technologies, then you'll love it at Vocantas.

Description:

You will take part in all stages of development of the complex state-of-the-art software products in the Microsoft .NET environment. Your day-to-day responsibilities will involve requirement analysis, software design, coding, debugging, unit testing and final integration. However, in a small team environment, creative ideas will be seriously considered at all levels, including new product features, new development tools and techniques, new software architectures, etc. At Vocantas, we value team-work and innovation!

Technical Qualifications:

- Web development including ASP.NET
- Object Oriented analysis and programming techniques
- Visual Studio .NET , C#
- Windows Operating System
- SQL database programming experience
- Microsoft Report Builder for SQL Server

Necessary Skills & Experience:

- Computer Science, Math or Engineering degree, and/or relevant software development experience
- Microsoft .NET experience

Non-Technical Qualifications:

- Ability to multi-task and work independently
- Self-starter with excellent problem-solving skills
- Detail-oriented

Skills considered assets:

- Previous IVR (Interactive Voice Response) system development experience
- Knowledge of telephony and/or fax (Dialogic, SIP)
- Multithreaded programming
- Windows Services programming experience
- Computer hardware knowledge
- Bilingual

Please send your resume in MS Word or PDF format to careers@vocantas.com with the position title in the subject line. No phone calls please.
