

Intermediate/Senior .NET Application Developer

If you are looking for a new challenge and like a high-energy environment working with innovative technologies, then Vocantas is looking for you.

Description:

The successful applicant will have an integral role in all stages of development of the complex state-of-the-art software products in the Microsoft .NET environment. Day-to-day responsibilities will include requirement analysis, software design, coding, debugging, unit testing and final integration of sophisticated solutions with little guidance from team members. However, as part of a small team of innovative developers, creative ideas will be expected, including new product features, new development tools and techniques, new software architectures, etc.

At Vocantas, we value team-work and innovation!

Technical Qualifications:

- Object Oriented analysis and programming techniques
- Visual Studio .NET (VB.NET, C#)
- Computer hardware knowledge
- Windows Operating System
- SQL database programming experience

Necessary Skills & Experience:

- Computer Science, Math or Engineering degree, and/or relevant software development experience
- Microsoft .NET experience
-

Non-Technical Qualifications:

- Ability to multi-task and work independently
- Self-starter with excellent problem-solving skills
- Detail-oriented

Skills considered assets:

- Previous IVR (Interactive Voice Response) system development experience
- Knowledge of telephony and/or fax (Dialogic, SIP)
- Multithreaded programming
- Windows Services programming experience
- IP networking and security
- System integration skills (i.e. web services, SQL)
- Web development (i.e. ASP.NET)

Please send your resume in MS Word format to careers@vocantas.com with the position title in the subject line. No phone calls please.

All applications must include your anticipated salary expectations in the subject line to be considered.
